I've also correctly completed the Authorization for Release of Institutional Account Information and Payment of the filing fee form but the authoritative officers that are needed to finalize this form (which I have included a copy) have failed to comply. This form is needed to gain access to funds my family provided so I can pay filing fees to further process my case. I've continually asked the officers to comply several times but I have never retrieved the original copy that the United States District Courts sent and advised me to complete and send back in order to pay the filing fees. The authoritative officers have been given the original copy by me Lewis Patterson to sign and return back to me but I haven't received the form back to this present day.

To whom this may concern, I, Lewis Patterson have tried numerous time to retrieve the legal information to comply with the rules and regulations of the federal court's. Captain Fred Williams and staff at the Simpson County Detention Center fail to allow me to exercise my civil and constitutional rights by not allowing me to get the correct information from the law library that is provided for inmates here. When I was finally allowed to gain access to the law library the information I specifically needed was and is currently missing. I've expressed this problem to several staff members here at the Simpson County Detention Center. I've also reached out to Captain Fred Williams and have received no response. In order for me to correctly state how my rights have been violated I need to gather information about certain laws that are being broken by staff here at the Simpson County Detention Center. I Lewis Patterson adamantly feel the laws are currently being violated by not allowing me to further progress in this important matter.
